

DRAMA

FS-LED 700

DESCRIPTION

The Drama FS-LED 700 is an extremely powerful follow spot LED fixture with a single source 350-W LED, producing outputs comparable to a 700-watt lamp or brighter. Faders and buttons are located directly on the back of the fixture to control the unit's features.

The unit has a color wheel that produces a red, green, yellow, blue, orange, and white spotlight. The Drama FS-LED 700 also features a CTO wheel, used both for adjusting color temperature and the color hue of each primary and secondary color.

The diameter of the spot can be easily adjusted with the unit's built-in iris, great for long-throw highlighting of small objects on stage. The Drama FS-LED 700 has a fader for controlling the smooth dimmer. A strobe fader controls the random and variable strobing of the LED for fantastic effects.

The unit is compact, allowing for easy transport and use in cramped spaces. The Drama FS-LED 700 comes with a powerCON connection and cord for powering the unit.

Features.

BRIGHTNESS

The Drama FS-LED 700 has a very bright 350W LED lamp with 3 color temp: 4353K, 4997K, 5062K.
