

MEGA CONSOLE

DESCRIPTION

The MEGA CONSOLE is the first console to feature 3 control platforms in one package, including Lumen8, Enlighten and Disco. The softwares range from a simplified introduction to our control platform to advanced production and theatrical control.

All three softwares include simple fixture profile builder, multi-universe output via ArtNet, direct fader channel programming and simplified built-in 3D visualizer.

With this console suppliers are now able to inventory one unit and still be able to offer it to a variety of customers including those in the club, event venues, houses of worship, production and theater industry.

3 CONTROL PLATFORMS IN 1

LUMEN8

- Advance production and theatrical Control
- Streamlined workflow, less steps to achieve desired look.
- Customizable playback and programming views with dual screen support.
- Cue View with detailed cue information and custom notes on the playback screen.

- Quickly access the strobe function on all strobe enabled fixtures
- Dedicated fog controller section with timing and bursts
- Sound active tempo base integration via line audio input
- Midi assignable sequence buttons
- RGB and RGBWA Matrix capability

Features.

SIMPLE FIXTURE PROFILE BUILDER

Compared to other consoles, the MEGA Console offers a quick and efficient process to create fixture profiles. Easily create custom channel names and multi-part fixtures with simplified value fields.

DIRECT FADER CHANNEL PROGRAMMING

The MEGA Console saves you time and gives you the ability to alter unique channel traits, simplifying the programming steps.

MULTI-UNIVERSE VIA ARTNET

Using a competitive protocol the MEGA Console offers up to 2,048 parameters that can be expanded to 12,288 via ArtNet, giving you additional control.

Specifications.
