

**MEGA
CONSOLE**

DESCRIPTION

The MEGA CONSOLE is the first console to features 3 control platforms in one package, including Lumen8, Enlighten and Disco. The softwares range from a simplified introduction to our control plarform to advanced production and theatrical control.

All three softwares include simple fixture profile builder, multi-universe output via ArtNet, direct fader channel programming and simplified built-in 3D visualizer.

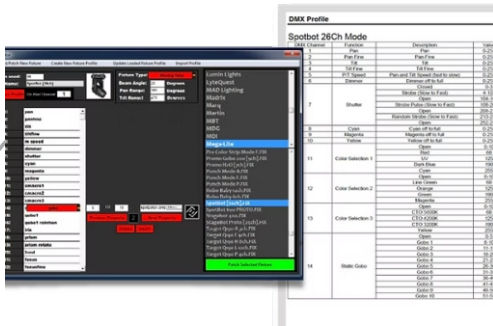

With this console suppliers are now able to inventory one unit and still be able to offer it to a variety of costumers including those in the club, event venues, houses of worshio, production and theater industry.

3 Control platforms in 1

Features

SIMPLE FIXTURE PROFILE BUILDER

Compared to other consoles, the MEGA Console offers a quick and efficient process to create fixture profiles. Easily create custom channel names and multi-part fixtures with simplified value fields

DIRECT FADER CHANNEL PROGRAMMING

The MEGA Console saves you time and gives you the ability to alter unique channel trails, simplifying the programming steps

MULTI-UNIVERSE VIA ARTNET

Using a competitive protocol the MEGA Console offers up to 2,048 parameters that can expanded to 12,288 via ArtNet, giving you additional control

Specifications

LUMEN 8:

- Streamlined workflow, less steps to achieve desired look.
- Customizable playback and programming views with dual screen support.
- Cue view with detailed cue information and custom notes on the playback screen.
- Create visually stunning effects quickly with our streamlined fader view fx engine.
- Custom fixture views, groups, and layouts for faster fixture selection.
- 24 Universes available with artnet.
- Control both moving lights and static lights with ease.

Enlighten:

- Button groups with dimming group faders that help organize different looks.
- Ability to crossfade video (BMP, AVI, MPG, WMV, MOV & MP4) and lighting.
- Pan and tilt tracking for better transitions between moving looks.
- Lighting programmer assistant quickly produces multiple pages of looks based on user defined parameters.
- Position / color presets.
- Real time fx.
- Virtual matrix UVE video to matrix compatibility.
- Built in RGB fx.
- Multi universe output via artnet.
- UVE programming capabilities, make on the fly.

DISCO:

- Lighting Programmer Assistant quickly produces multiple pages of looks based on user-defined parameters.
- Easily create synchronized timeline shows for pre-programmed intros or tracks.
- Control of live show from DJ controller via provided WAV file.
- Quickly access the strobe function on all strobe-enabled fixtures.
- Dedicated fog controller section with timing and bursts.
- Sound-active tempo base integration via line audio input.
- MIDI-assignable sequence buttons.
- RGB and RGBWA matrix capability.

Shared highlights:

- Simple FIXTURE PROFILE BUILDER.
- Up To 24 MULTI-UNIVERSE OUTPUT Via ARTNET.
- Direct FADER CHANNEL PROGRAMMING.
- Simplified Built-In 3D VISUALISER.
